

Metric 4 — UAE PDPL Regulatory Alignment

UAE Federal Decree-Law 45/2021 articles explicitly mapped to detection findings

BASELINE (BEFORE KAKASHI)	CURRENT RESULT (V1.1.0)	IMPROVEMENT
0 No open-source or commercial tool maps its findings to specific PDPL articles. Compliance officers must manually cross-reference every finding against the law	9 Art. 1 (Personal Data), Art. 5 (Processing Conditions), Art. 6 (Consent), Art. 9 (Data Subject Rights), Art. 15 (Sensitive Personal Data), Art. 20 (Security), Art. 21 (Breach Notification), Art. 22 (Cross-Border Transfer), Art. 25 (DPO Duties)	+9 articles New capability

Evidence & reproduction

Source of truth	<code>src/lib/pdpl-mapping.js</code> – flat data file, reviewable by legal counsel
Reproduce	<code>kakashi scan-dir . -f html -o audit.html</code> → every finding cites its article
Public URL	https://github.com/Muhammdatef/kakashi/blob/main/src/lib/pdpl-mapping.js

How to verify

- Clone the public repository: `git clone https://github.com/Muhammdatef/kakashi`
- Install dependencies: `cd kakashi && npm install`
- Run the reproduce command listed above in the "Evidence & reproduction" table.
- Confirm the current-result number matches this document.

Methodology

Baseline figures cited above are drawn from public product documentation of the comparator tools. Current results are measured directly against the Kakashi v1.1.0 codebase at the git commit tagged in the repository release notes. Every quantitative claim is reproducible in under five minutes on any Node ≥ 18 machine with no vendor accounts required.
