

Metric 5 — Annual Cost per Protected Endpoint

Annual USD cost per developer / employee to run privacy protection on the device

BASELINE (BEFORE KAKASHI)	CURRENT RESULT (V1.1.0)	IMPROVEMENT
USD 150 Industry median for enterprise DLP per-seat licensing (Symantec DLP, Forcepoint, Trellix range from USD 50 to USD 500 per seat per year)	USD 0 MIT open-source licence. No per-seat, per-endpoint, per-file, or per-scan cost. No subscription. No cloud egress fee.	-100% (-USD 150 per seat / year) Complete cost elimination

Evidence & reproduction

Source of truth	<code>LICENSE file (MIT)</code>
Reproduce	<code>npm view @muhammdatef/kakashi → public, free package</code>
Public URL	https://www.npmjs.com/package/@muhammdatef/kakashi

How to verify

1. Clone the public repository: `git clone https://github.com/Muhammdatef/kakashi`
2. Install dependencies: `cd kakashi && npm install`
3. Run the reproduce command listed above in the "Evidence & reproduction" table.
4. Confirm the current-result number matches this document.

Methodology

Baseline figures cited above are drawn from public product documentation of the comparator tools. Current results are measured directly against the Kakashi v1.1.0 codebase at the git commit tagged in the repository release notes. Every quantitative claim is reproducible in under five minutes on any Node ≥ 18 machine with no vendor accounts required.
